

MENDELEY

Glutamate/glutamine in ADHD
S Maltezos et al

npg

8

approval for this study was provided by South London and Maudsley/Institute of Psychiatry NHS Research Ethics Committee, study reference 1997/087. Parts of the present work were presented in the form of a poster at the 3rd International Congress on ADHD, Berlin, Germany, 26–29 May 2011.

With Mendeley you can

- gather and organize your references
- download citations from databases and webpages
- insert citations in *Word* while writing, and create references automatically in the style chosen
- exchange bibliographies with your colleagues
- read your PDF's and enrich them with notes and highlights

You have to install
specific plugins

Create your account, possibly using your UniMi e-mail username (@unimi.it or @studenti.unimi.it)

Mendeley has a web
version,

www.mendeley.com,

to be used also on
tablets, smartphones
and iPads,

and a
desktop version;
they have to be
mutually synchronized

The screenshot shows the Mendeley web interface. On the left is a dark sidebar with a refresh icon (a circular arrow) and a circular icon with the letters 'FB'. An orange arrow points to the refresh icon. The main area displays a list of items:

<input type="checkbox"/>	☆ Getz M	1997	Evaluating Digital Strategies for Storing and Retrieving Scholarly Information
<input type="checkbox"/>	☆ Lawrence S, Connaway L, Brigham K	2001	Life cycle costs of library collections: Creation of effective performance and cost metrics for library resources
<input type="checkbox"/>	☆ Morrall J	1960	The Idea of Order
<input type="checkbox"/>	☆		LQCostComparison198907.pdf

IMPORTANT WARNING

- *Mendeley* is in constant evolution
- We are now presenting *Mendeley Web* and its most recent, almost identical desktop version *Mendeley Reference Manager*

Mendeley Web Home page

The *free* all-in-one reference manager

Mendeley helps you stay organized, do more in less time, and bring ease to your research workflow.

 [Download for Windows](#)

or [Get started on Mendeley Web ↗](#)

Enjoy 2GB of free storage

Add papers straight from your desktop.
Generate references. Sync your research.
Effortlessly.

Advanced knowledge at speed

Like a research assistant that knows your
library inside out, AI quickly finds what you
need.

Trusted by millions of researchers

Researchers and students worldwide use
Mendeley to simplify, organize, analyze and
cite.

Welcome to Mendeley

Search for and add articles to your library

Search

Try: [COVID-19](#) | [Bioenergy](#) | [Obesity](#) | [Intrinsic Motivation](#)

Mendeley's catalogue contains the bibliographic references imported by users of the resource since its creation.

It is not possible to identify who imported a reference.

Possible multiple references imported from different sources are deduplicated.

Mendeley's catalogue is NOT a database and can not be considered an instrument for exhaustive research.

Language Add language

Page(s) 541-550

- We can create a new COLLECTION and drag a file into the open page

The screenshot shows the Mendeley Desktop interface. At the top, there is a browser tab bar with several tabs open, including 'Distribution basics...', 'Open access- Wiki...', 'An overview of the...', 'Capitolato. 2016', 'EDI per gli acquisti...', 'Data mining - Wiki...', 'Predatory Journal...', 'The evolution and ...', 'Text mining - Wiki...', 'Modalità prestito d...', and 'More'. Below the tabs, the main window displays 'All References / Course'. On the left sidebar, there is a '+ Add new' button and a list of reference categories: 'All References', 'Recently Added', 'Recently Read', 'Favorites', 'My Publications', 'Unsorted', 'Duplicates', and 'Trash'. Below these is the 'COLLECTIONS' section, which lists several collections: 'Assistenza sanitaria d'Ateneo', 'Biblioteconomia - Articoli & materia...', 'Costi documenti cartacei in bibliote...', 'Course', 'Gara monografie', 'Gara rilegature 2022-2024', and 'Manualistica biblioteconomica'. At the bottom of the 'COLLECTIONS' list, there is a 'Create collection' link. A green arrow points to the 'Course' collection, and a red arrow points to the 'Create collection' link. The main area of the window displays the message: 'No references in this collection. Drag and drop PDFs here to add references to this collection.'

- **+ Add references** can be used to:
 - import files or whole folders located on our PC;
 - import bibliographic records in BibTeX, Endnote or Ris formats;
 - import new files automatically as soon as they become part of a specially selected local folder (on desktop version only);
 - create a bibliographic record manually

The screenshot shows the Mendeley Desktop interface. The 'Add references' button is circled in green. A dropdown menu is open, showing options like 'Import file(s)', 'Import folder(s)', 'Import library', 'Set up watched folder', 'Add reference manually', 'NEED HELP?', 'Help guide', and 'Get support for adding references'. A green arrow points to the 'United Nations' entry in the reference list.

Abstract

Pneumonia is one of the commonest infections in elderly patients. The pathogens responsible for pneumonias in the elderly are the same as in younger adults. Because of associated cardiopulmonary disease and/or impaired host defenses, pneumonia in elderly patients is associated with increased mortality and morbidity compared to younger patients. The clinical importance of pneumonias in the elderly relates to age-dependent and pathologic changes in the immune system as well as the lungs. Pneumonias in the elderly may be classified, for clinical purposes, according to their location of acquisition, i.e. community-acquired pneumonias, nursing home-acquired pneumonias, or hospital-acquired pneumonias. The clinical presentation of pneumonias in the elderly may be difficult, due to pre-existing cardiopulmonary disease that mimics pneumonia. This review discusses the diagnostic

Mendeley Web Importer may not work with some databases and e-journals.

In that case records can be imported by being previously saved locally as RIS files.

Mendeley automatically warns whenever a file is being duplicated

The screenshot displays the Mendeley Desktop application interface. On the left, a sidebar contains navigation options: All References, Recently Added, Recently Read, Favorites, My Publications, Unsorted, Duplicates, and Trash. Below these are 'COLLECTIONS' including Assistenza sanitaria d'Ateneo, Biblioteconomia - Articoli & mate, Costi documenti cartacei in bibli, Course, Gara monografie, and Gara rilegature 2022-2024. The main area shows a list of references with columns for checkboxes, status icons (green dot, star), author names, years, titles, and subjects. A blue dialog box is overlaid on the right, indicating a successful upload and a duplicate warning. The dialog text is: '1 file uploaded, 1 reference generated' (top bar), '1 generated reference already exists in your library.' (main message), and a 'Review duplicates' button. The file name 'Tartarotti-Fes...i-Balestro.ris' and its size '2 KB' are visible at the bottom of the dialog.

Labor Costs in the Technical Operation of Three Research Libraries

by Malcolm Getz and Doug Phelps

The costs and operations of the back office activities of three middle-sized research libraries are investigated, focusing on the costs of labor, and the effects of automation. The resulting analysis will be useful to decision makers

In light of the rapid pace of automation in research libraries, there is special interest in trying to understand the structure of costs in the back office functions of the libraries. The introduction of computers lowered costs, radically transforming the back office functions of banks and insurance companies from regiments of clerical workers managing legions of filing cabinets to computer centers with a small cadre of more highly skilled workers. Driven by competitive pressures, financial institutions that failed to make effective use of the

primarily, the other two use the Online College Library Center (OCLC) ¹

Our method for investigating costs is straightforward. We rely on the records routinely kept by the operating units. By looking only at three libraries and by gathering the data by interviews, we are able to make some reclassifications and to achieve greater comparability than would otherwise be possible. We include enough detail so that important differences between the institutions will be revealed. At the same time, we maintain a high enough level of abstraction so

Labor Costs in the Technical Operation of Three Research Libraries

by Malcolm Getz and Doug Phelps

The costs and operations of the back office activities of three middle-sized research libraries are investigated, focusing on the costs of labor, and the effects of automation. The resulting analysis will be useful to decision makers

In light of the rapid pace of automation in research libraries, there is special interest in trying to understand the structure of costs in the back office functions of the libraries. The introduction of computers lowered costs, radically transforming the back office functions of banks and insurance companies from regiments of clerical workers managing legions of filing cabinets to computer centers with a small cadre of more highly skilled workers. Driven by competitive pressures, financial institutions that failed to make effective use of the new systems ceased to exist. Is automation in research libraries likely to have similarly radical effects? How will costs and operations change with automation?

We have looked at the costs and operations of the back office activities of three middle-sized research libraries. The libraries are automated in different ways and to different degrees and so provide some useful contrasts. We

primarily, the other two use the Online College Library Center (OCLC) ¹

Our method for investigating costs is straightforward. We rely on the records routinely kept by the operating units. By looking only at three libraries and by gathering the data by interviews, we are able to make some reclassifications and to achieve greater comparability than would otherwise be possible. We include enough detail so that important differences between the institutions will be revealed. At the same time, we maintain a high enough level of abstraction so that the resulting analysis will be useful to decision makers. Our method is generally in the tradition of others who have studied technical service costs, although we are more willing to trade away some detail in order to get a clearer sense of the big picture ²

and management of e-book collections.

Although the idea of e-books is not new, there is still much confusion about e-books, even around a basic definition of what an e-book is (Gold Leaf, 2003; Tedd, 2005; Bennett and Landoni, 2005). In the last few years the e-book definition has been the

subject of renewed interest, “involving text read via a glass screen” (Hughes, 2005). Various attempts have been made in the literature to define the e-book. The definition provided by Armstrong *et al.* (2002, p. 217) is

“any piece of electronic text regardless of size or composition (a digital object), but excluding journal publications, made available electronically (or optically) for any device (handheld or desk-bound) that includes a screen”. The working definition used by JISC is “an online

variety than that of merely any digital text. Various attempts have been made to define the e-book. The definition provided by Armstrong *et al.* (2002, p. 217) is “any piece of electronic text regardless of size or composition (a digital object), but excluding journal publications, made available electronically (or optically) for any device (handheld or desk-bound) that includes a screen”. - Just left-click on a passage you have underlined, or highlighted with «Highlight text» ...

... and it can be saved in one of the *pages* you will have created in the «Notebook» section of the document's record.

The screenshot displays a digital library interface. On the left, a document is open, showing a highlighted passage in green. The highlighted text reads: "The California State University Library System recently participated in an eBook pilot project that studied several different methods for acquiring and accessing e-books." Two red arrows point from this highlighted text to the notebook sidebar on the right. The sidebar, titled "Notebook", contains two entries: "My citations" and "My bibliography", both dated "2 minutes ago". At the bottom of the sidebar, there is a "New page" button. The document's title is "Lynn Silipigni Connaway and Stephen R. Lawrence".

The quotation will be visible in the «Notebook» section of any record in your library; by clicking on it, the highlighted passage will be visualized in the original pdf document

Personal notes are automatically stored in the «Annotations» section of the record.

The screenshot displays a digital library interface with a PDF document open. The document text is visible on the left, and the right sidebar shows the 'Annotations' section. The 'GENERAL NOTES' section contains a text input field with the placeholder 'Add general notes about this reference here'. Below it, the 'COMMENTS' section shows a comment by Fabio Bottazzi (FB) with the text 'Very important!'. The comment is highlighted with an orange box. The 'Annotations' tab is selected in the top navigation bar, and an orange arrow points to it. The document title is '28_A_Comparison_of_the_Func...ocesses_Associated_with.pdf'.

They can only be visualized in the record of the specific pdf document concerned.

Notebook and Annotations

Notebook and *Annotations* can be visualized by clicking on «Info» at the righthand top corner of the page when the file involved is open.

In light of the rapid pace of automation in research libraries, there is special interest in trying to understand the structure of costs in the back office functions of the libraries. The introduction of computers lowered costs, radically transforming the back office functions of banks and insurance companies from regiments of clerical workers managing legions of filing cabinets to computer centers with a small cadre of more highly skilled workers. Driven by competitive pressures, financial institutions that failed to make effective use of the new systems ceased to exist. Is automation in research libraries likely to have similarly radical effects? How will costs and operations change with automation? We have looked at the costs and

primarily, the other two use the Online College Library Center (OCLC) ¹

Our method for investigating costs is straightforward. We rely on the records routinely kept by the operating units. By looking only at three libraries and by gathering the data by interviews, we are able to make some reclassifications and to achieve greater comparability than would otherwise be possible. We include enough detail so that important differences between the institutions will be revealed. At the same time, we maintain a high enough level of abstraction so that the resulting analysis will be useful to decision makers. Our method is generally in the tradition of others who have studied technical service costs, although we are more willing to trade

What would you like to know about this publication?

Adding items to *Mendeley Reference Manager Desktop*

- Records and documents can be imported exactly like in the web version, except when an internet connection is required.
- Whenever an item is added to either version of *Mendeley*, the other version will be automatically synchronized as soon as it is opened.
- Anyway, clicking on the «Sync» key before leaving a working session is a measure that will protect *Mendeley's* users from any possible mishap

Backing up files

Documents in any format (PDF, Word, JPEG etc) attached to a record should be backed up on your PC or on a server for safety.

Using references to create a bibliography

Fighting Child Poverty in America: How Research Can Help

INTRODUCTION

This enhancement is primarily attributed to the crucial role of soil microorganisms, whose contribution to soil fertility is significant and often underappreciated (Yuan et al.)

However, the effects of varying biochar application rates on soil functional biota, particularly within aggregates that expand soil spatial heterogeneity, remain unclear (Zuin et al. 2020; Baggio et al. 2019)

- Select «Keep live updates»
- The sources of all subsequent citations will increase your reference list automatically

INTRODUZIONE

Mendeley Cite is our brand-new citation tool which we are continuously developing, with new features and functionality being added regularly. (Todd, 2018).

Help us make sure Mendeley Cite does what you need by giving your feedback using the link from the tab at the bottom-right of the add-in (Lee *et al.*, 2016; Miles, 2018).

Mendeley Cite is compatible with Microsoft Office 365, Microsoft Word versions 2016 and above and with the Microsoft Word app for iPad®.

If you are using an earlier version of Word, you can use the existing Mendeley Citation Plugin for Word available with Mendeley Desktop.

- Select the style you like, and all your citations will be modified accordingly clicking on «Update citation style» below

Synchronizing with *Mendeley Library*

The screenshot shows the Microsoft Word interface with the Mendeley Cite sidebar open. The sidebar has two tabs: 'References' and 'Citation Settings'. The 'Citation Settings' tab is active, showing options for 'CITATION STYLE' (Aging Cell) and 'CITATION LANGUAGE' (English (US)). A red arrow points to the 'Sync' button (represented by a circular arrow icon) located in the top right corner of the sidebar.

- Click on the Sync button to synchronize *Mendeley Cite* with *Mendeley Library*

- Use CSL Editor: <https://cs1.mendeley.com/about/>
- Insert the URL of your newly created style in *Mendeley Cite* by selecting "*Add a custom style*"
- Use guide: <https://www.mendeley.com/guides/csl-editor>

CSL Editor: creating a new style from a similar one

Find and edit CSL citation styles

Search for the name of a style, the title of a Journal, or [search by example](#).

Note: This set of tools is still in public beta. Please report any bugs or feedback using the form at the top right of the screen.

1. Find a style

Search by name

If you're looking for a style like APA, Harvard, etc... just use the search box at the top of the page to search for a style name, or journal title.

Search by example

If you don't know the name of the style, but know what the final citation should look like, you can use our [search by example](#) tool to find styles that most closely match.

INLINE CITATION

(McInnis & Nelson, 2011)

BIBLIOGRAPHY

McInnis, M. D., & Nelson, L. P. (2011). *Shaping the Body Formation in Early America*. University of Virginia Press.

2. Edit the style

If you can't find a style that quite suits your needs, find one that's a pretty close match and click the "Edit style" button to open that style in the [visual editor](#).

American Journal of Medical Genetics

INLINE CITATION [McInnis and Nelson, 2011]

BIBLIOGRAPHY McInnis, MD, Nelson, LP. 2011. *Shaping the Body Formation in Early America*. University of Virginia Press.

Title	The varieties of capitalism and hybrid success
Author	John L. Campbell, Ove K. Pedersen
Issued	2007/3/1
Container-title	Comparative Political Studies
Volume	40
Issue	3
Page	307-332
Abstract	The varieties of capitalism literature maintains that advanced capitalist countries whose institutions best fit either the liberal or coordinated market economy types will perform better than countries whose institutions are mixed. This is because hybrids are less likely to yield functionally beneficial institutional complementarities. The authors challenge this assertion. Denmark has performed as well as many purer cases during the 1990s. And Denmark has recently developed a more hybrid form th...
